MAGOWEB

ZUCCHETTI

A MODERN AND RELIABLE WEB SOLUTION,
SELF-CONTAINED AND CUSTOMIZABLE

MagoWeb is an ERP management software accessible via web using a browser on a local network or the internet, providing security, reliability and the ability to operate in any business environment. Based on an innovative technology and designed to support companies in the Industry 4.0 arena, MagoWeb is designed to add value and exploit the full potential of your business by turning new technologies into opportunities.

MagoWeb is intended for SMEs in search of an intelligent, lightweight ERP solution that can be scaled as the business grows.

The success of MagoCloud, able to cover the needs of more than 60 product sectors, has led to the creation of software offering the same functions and based on the same technology, but built on the web, with autonomous installation and upgrades.

MAGOWEB

CHOOSE YOUR STARTER PACKAGE OR CONFIGURE MAGOWEB À LA CARTE

Whatever your industry, MagoWeb is always the right choice for achieving real business results thanks to specific core Packages, developed by experts who know exactly what challenges your company faces.

Packages guarantee functional coverage **meeting the needs of all the corresponding sectors and subcategories.**

If the Packages are not enough, you can choose **MagoWeb à la carte, your fully customisable Web ERP** responding to the real needs of your company.

● ○ ○ ○

SMALL BUSINESS PACKAGE

MagoWeb has an impact on all critical parts of the business to help improve revenues, keep expenses in check, improve the decision-making process and transform data into usable information.
MagoWeb is, moreover, designed to respond to growing demand for compliance with regulations and manage all your global operations and multi-branch locations easily and efficiently. The Small Business Package starts with basic coverage of Accounting, Sales and Inventory Management needs.

● ● ○ ○

ADVANCED PACKAGE

Companies that have a specific focus on resale of goods and services need lean, efficient tools providing effective support to all business sectors. With this package, MagoWeb provides administrative and logistics staff, the sales force and, last but not least, management with a wide range of predefined and ready-to-use features.

● ● ● ○

STOCK & STORE PACKAGE

This package offers optimal coverage of the needs of companies whose focus is mainly on the resale of goods: it is designed to offer a centralised vision of this kind of work with optimised management of orders, inventory, procurement and shipments. Processes are optimised with the digitisation of flows and activities, for significant savings in terms of time and management.

● ● ● ●

TRADE PACKAGE

MagoWeb offers tools for optimising the business processes of companies dealing with wholesale distribution, supporting the management of sales orders, prices, shipments, procurement and billing. The availability of accurate, real-time information ensures that situations requiring attention can be promptly identified and addressed. The functional focus is on the optimised and complete management of the Supply Chain and warehouse logistics, but the Financial area functions are also included.

TAILOR-MADE FOR YOU!

MagoWeb is intrinsically open to integrations and custom solutions, achievable through the development platform and the MagoWeb Suite framework infrastructure, or third-party applications.

Equip your business with tools tailored to suit your needs!

INTEGRATIONS | CUSTOMISATIONS REFINING PROCESSES | ADVANCED REPORTING | VERTICALISATIONS

Powerful development tools will mould MagoWeb around your business, creating vertical solutions integrated with MagoWeb, and even full stand-alone solutions.

For those seeking even greater performance, discover the MagoWeb suite designed to meet all your operational, development and business needs.

FLEXIBILITY MEANS HAVING THE SOLUTION TO ALL KINDS OF NEEDS

MagoWeb caters to all SMEs, of any size, in any market sector.

MagoWeb also adapts its delivery method to your needs, and is capable of evolving with the growth of your business.

INTEGRATED WITH THE ZUCCHETTI WORLD

MagoWeb natively includes connections with Zucchetti solutions to offer you everything your company needs to operate at its best: Digital Hub for Electronic Invoicing and digital communications, Anticipay for credit control, solutions for accountants, financial statements and notes, payroll solutions, GDPR, POS solutions, ...

TASKBUILDER FRAMEWORK

This is MagoWeb's supporting infrastructure, which also serves as an independent environment.

TBF represents an application base that can be managed independently and is available on client/server and/or cloud platforms, on which vertical solutions, add-ons and embedded and stand-alone cross products can be developed.

MAGO API

Creates customized solutions implemented in any programming language, by allowing you to interface with MagoWeb via REST APP.

OPEN SOLUTIONS

The OpenPOS, OpenECommerce, OpenMES, and other modules integrate the external solutions necessary to cover your business.

Also discover the Zucchetti Solutions already integrated in MagoWeb.

A 100% ACCESSIBLE
ERP SYSTEM

To ensure limitless access,
the MagoWeb layout adapts
automatically to the form factor of
the device you are using (different
resolutions, tablets, smartphones).

The design conceived for various
outputs, minimises the need to
resize and scroll through content
and allows you to make the most
of the features of your device.

With responsive web design and
the versatility of MagoWeb, you're
sure to be productive anytime,
anywhere, with any device.

MAGOWEB IS AN
ON-PREMISES SOLUTION,
WITH TWO DIFFERENT
PURCHASE MODELS.

DEPLOYMENT
On premises
Data Centre / cloud

PURCHASE
License + maintenance fee
PPU (Pay per Use)

TASKBUILDER STUDIO

Reporting Studio
Reporting system shipped
with its own development tool,
intuitive and complete. Reports
are 100% parametrizable,
can be sent by email or stored
automatically, and can include
links to other reports, MagoWeb
documents, Google Maps and
Skype; the data can be exported
in various formats.

MyMago Studio
Intuitively manages graphical
and functional customisation
of an existing management
document and creates templates
from scratch. MyMago Studio can
create any kind of object,
from text fields to checkboxes,
combo-boxes and body-edits.

TaskBuilder Cloud
The development environment
shared with MagoCloud, which
provides the collection of classes
and components underlying the
definition of documents, entities
and processes, with which
to create new features
and integrate existing ones.
